

# South Coast Water Company is Expanding to Improve Water Quality and Enhance Service Reliability to Dunes City Residents.

## IMPROVED WATER QUALITY

As Siltcoos Lake continues to experience water quality issues due to toxic algae blooms, moving Dunes City customers from Siltcoos Lake to Woahink Lake is a key priority of Dunes City.

## ENHANCED WATER SERVICE

Many Dunes City water customers are served by individual water connections to either Siltcoos Lake or Woahink Lake. Connection to a centralized water system will enhance water service through improved reliability and monitoring, 24/7 service support, regulatory compliance, and customer engagement.

## WATER SYSTEM EXPANSION

Since 1980, South Coast Water Company has been providing safe, reliable and cost-effective water service to Dunes City residents. South Coast is working with the City to expand its system to serve more residents of Dunes City.
